## **Artistic Designs.**

**T**his book is published to illustrate the beautiful designs in Artistic Hardware manufactured by us and to enable you to select suitable trimmings for your building if you so desire. If your hardware dealer cannot quote you prices for the goods that you may select, have him send to us and we will give him prices. If you have an architect's specifications, get your hardware man to send us a copy of the hardware wanted and we will make an estimate for him. Our goods are made in proper proportions and are right mechanically as well as being beautiful in design. We furnish these artistic designs in all desirable finishes.

**D**aity bits of metal deftly worked by skillful artisans into handsome trimmings for the doors and windows of beautiful homes are embraced in the hardware designs of Sargent & Co. People are selecting their trimmings with great care nowadays. This book shows our goods in groups, but we cannot illustrate the several finishes, neither does each group show all the goods of a design. We make everything in hardware that is required for a building.

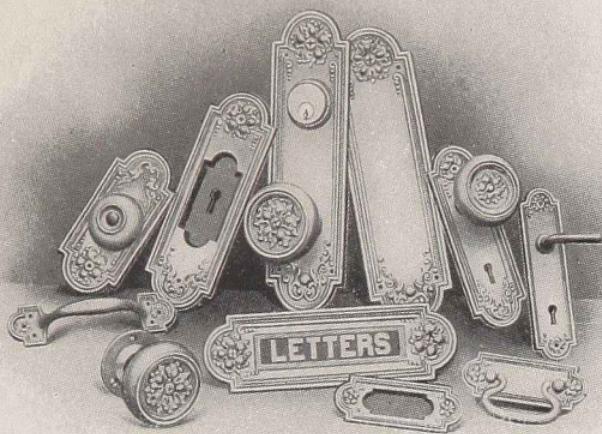

A C—ANDOVER (COLONIAL) CAST BRONZE  
P C—PORTSMOUTH (COLONIAL) WROUGHT BRONZE

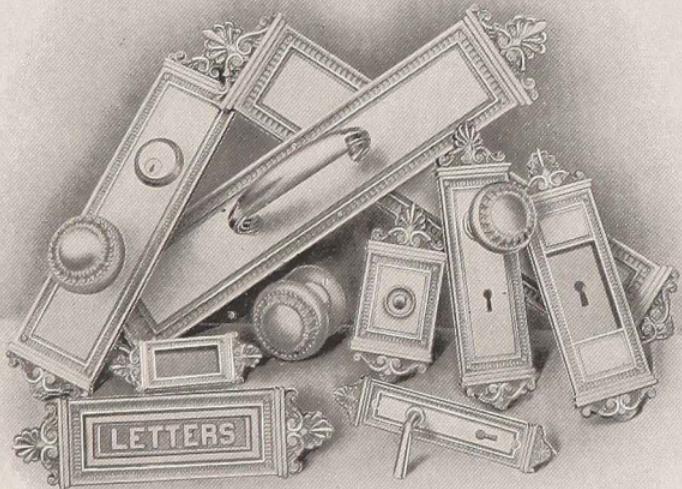

A D—ANTWERP (FLEMISH)

**I**f you propose building you cannot fail to be interested in the fine Hardware shown in the groups in this book, nor will it pay you to ignore the claims that we make for Sargent's Easy Spring Locks. We say that they are the best goods manufactured—best mechanism, best finish, best adapted for the purpose intended—but don't you believe it simply because we say it; examine them yourself and we shall be satisfied. In looking for our Easy Spring Locks, be sure to see that  is cast on the case of the lock.

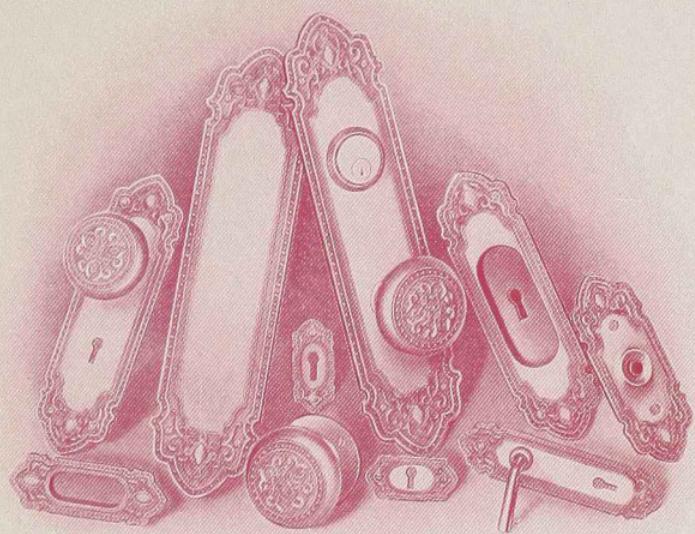

A F—ARNON (FRENCH RENAISSANCE)

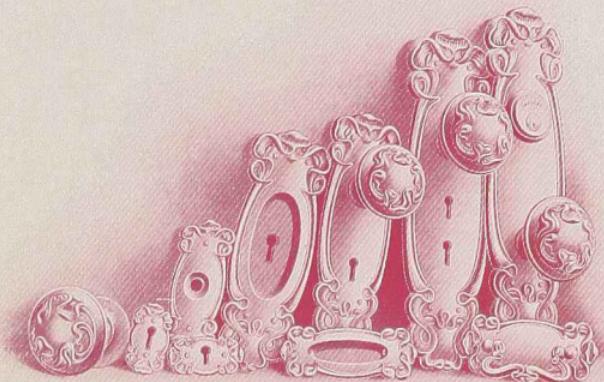

A G—ARGOS (GREEK)

**E**very room different if you so desire. From this book you may select one design for the whole house and vary the finishes—Antique Copper, Old Brass, Oxidized Silver, Verde Antique, or any other finish—or you may select a different design for every floor, or you may choose to have every room different. For the parlor or library, the dining room or kitchen, a pleasing and satisfactory selection can be made, each piece adapted to its particular use, and all harmonizing with the popular and modern styles of architecture.

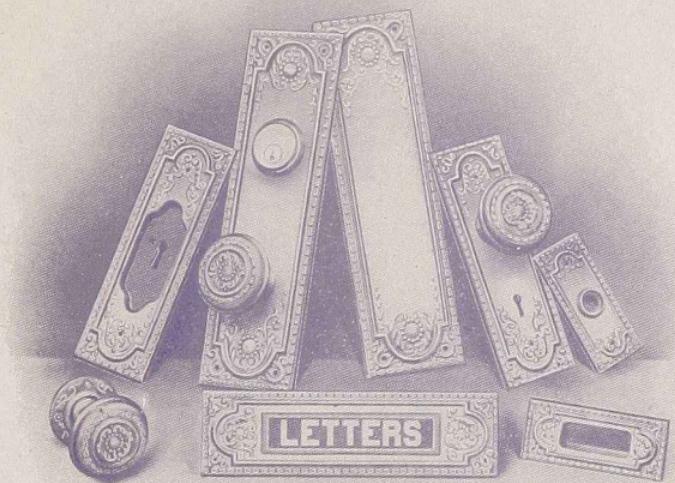

A M—ALHAMBRA (MOORISH)

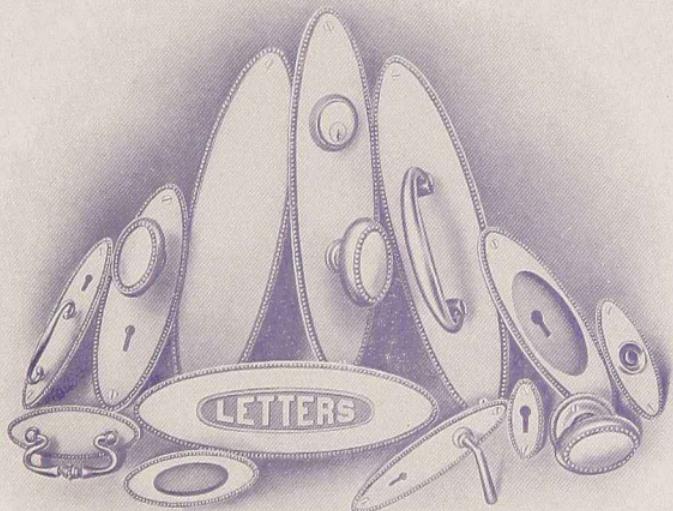

A N—ALBY (L'ART NOUVEAU)

**C**omfort in the home is brought by the use of Sargent's Locks; suitable hardware trimmings add to the enjoyment. From this book you may select the designs which best suit your purpose, and we will furnish goods through your hardware dealer that cannot fail to please. In looking for Sargent's Easy Spring Locks, be sure that you see  cast on the case of the lock—don't mind the label.

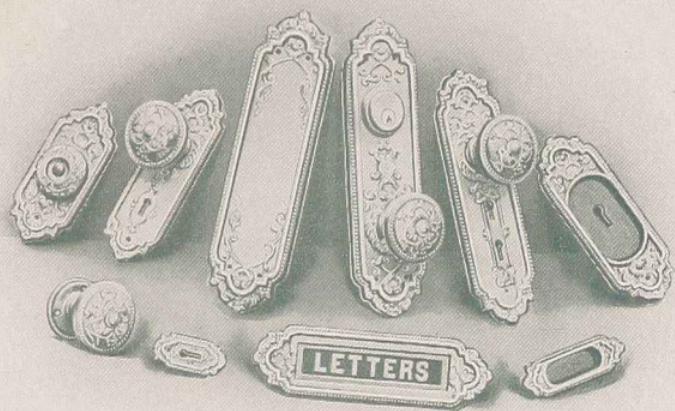

A R—ARAMIS

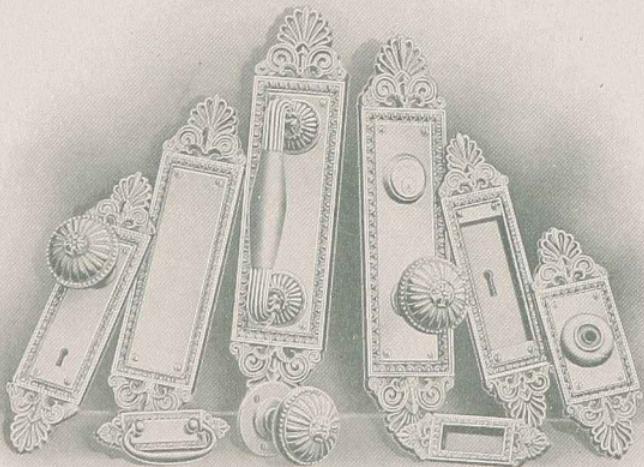

B C—BRANDON (COLONIAL)

**W**ear and tear should be considered in buying hardware for any kind of a building. Durable locks and trimmings that will stand all kinds of usage—in other words, Sargent's Easy Spring Locks and Artistic Hardware—are selected by careful people. The better the building the better the trimmings, but that does not mean that structures of moderate cost cannot be handsomely trimmed; some of our designs are very low in price.

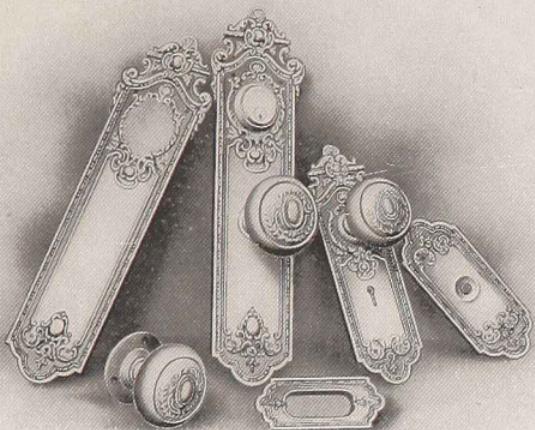

B F DESIGN

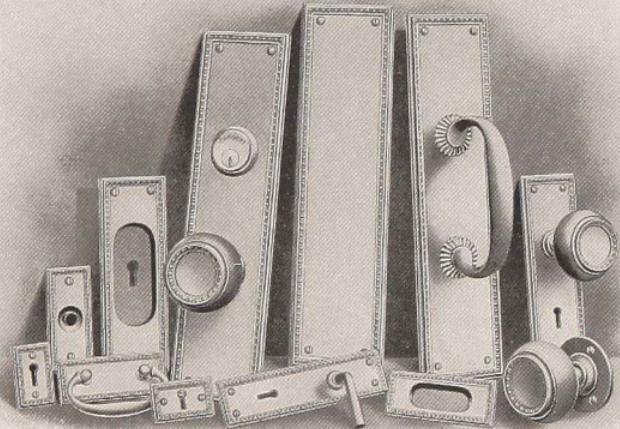

B G—BULIS (GREEK)

**B**ecause they are beautiful you must not get the idea that they are extravagant. It will take only a few dollars to fit up your house with Sargent's Easy Spring Locks and Artistic Hardware, and the difference in cost over ordinary hardware is trifling. This book will enable you to select what you like, and if you will talk to your hardware dealer about it he will give you the prices; if he cannot do so off-hand, have him send to us and we will make for him an estimate covering all your requirements.

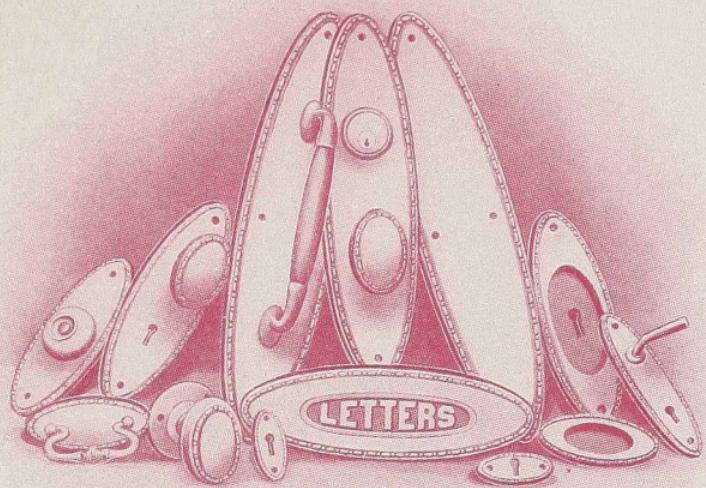

B R—BERGERAC (LOUIS XIV)

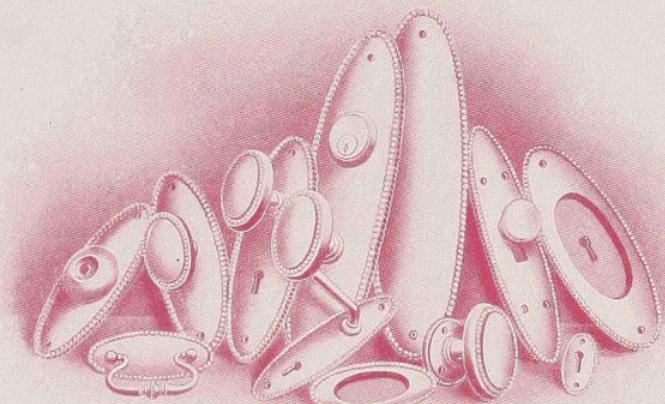

C A—CORINTH (GREEK)

**A**rtistic hardware adds much to the appearance of a building. A beautiful design is pleasing to the eye of passers-by, and a satisfaction to the occupant of the house. Our designs are handsome, and suitable for different styles of architecture. Colonial houses should be trimmed with hardware which will harmonize with that popular and ornate style of architecture. From the several Colonial Designs made by us a selection can easily be made.

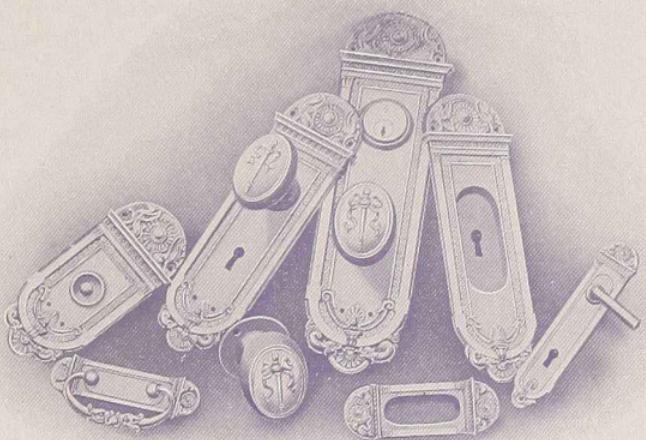

C C—CHESHIRE (COLONIAL)

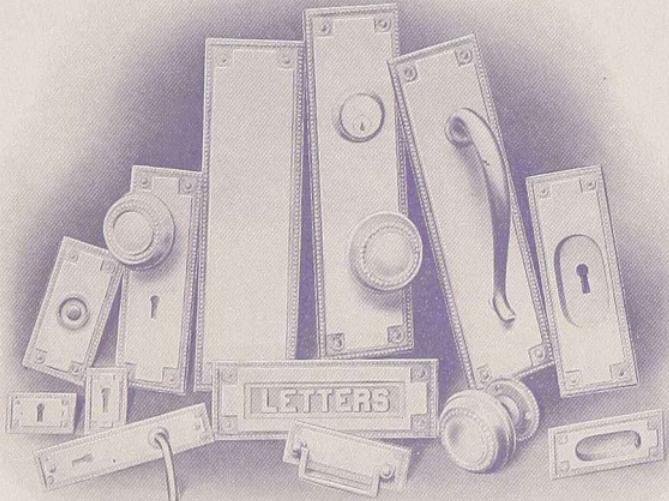

C D—COPLEY (COLONIAL)

**H**igh grade applied to Sargent's Artistic Hardware means that no better goods are made. They are intended for use in buildings where the best is required, and the best should be required in all buildings. Daily use does not injure good hardware, and locks and trimmings made by us will stand the wear and tear in the home or store, the office or shop, the school or church. The day of poor hardware for good buildings is past.

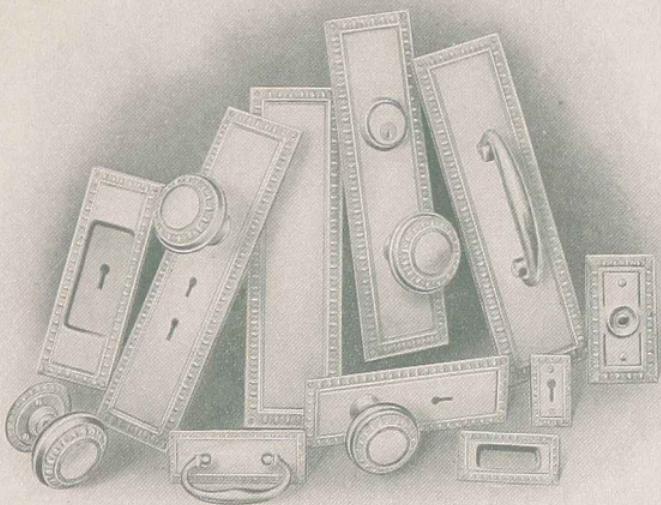

C E—CLERMONT (EMPIRE)

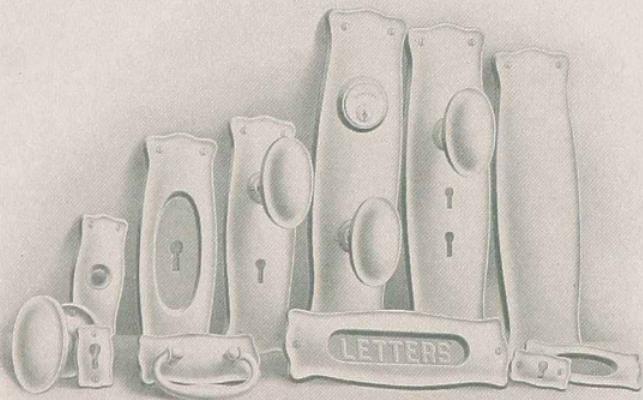

C F—CALVI (LOUIS XVI)

**I**t will please you. A man in Indiana, who had just finished building a new home in which he used Sargent's Hardware, wrote: "One of the nicest parts of our new home is Sargent's Hardware; I am well pleased with it. Am glad I could not be induced to have any other."

When a dealer says that some other hardware is "as good as Sargent's," he acknowledges that Sargent's is the standard. Don't be induced to purchase substitutes said to be "as good," but use the standard and feel satisfied.

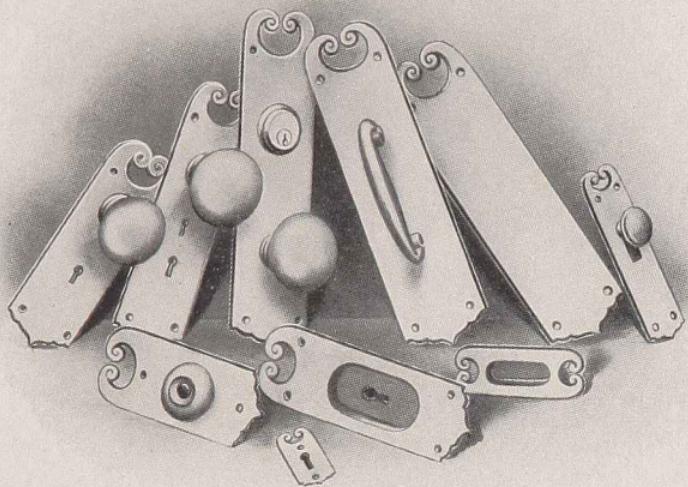

C G—CRETE (GREEK)

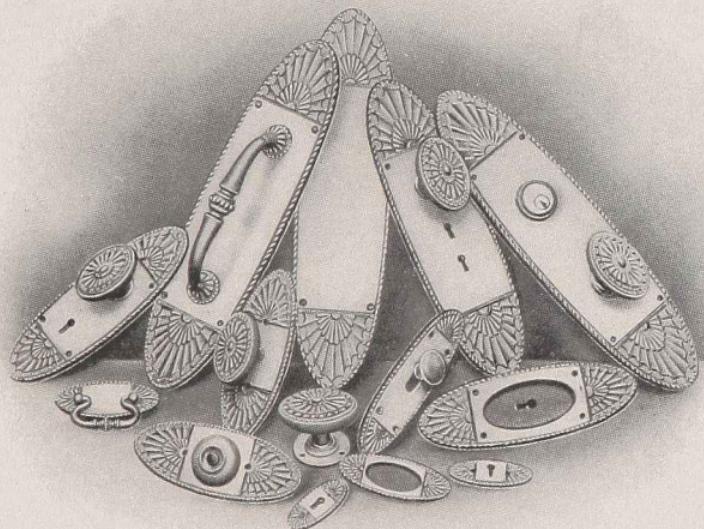

C H—HAMPTON (COLONIAL)

**F**or Colonial Houses we illustrate in this book a number of designs. We make also Cut Glass Knobs, Door Knockers, Door Latches and other reproductions of the hardware of former days, which will be of particular interest to those whose buildings are to be of the Colonial style. These trimmings are shown in a special "Colonial" booklet, which will be sent on application.

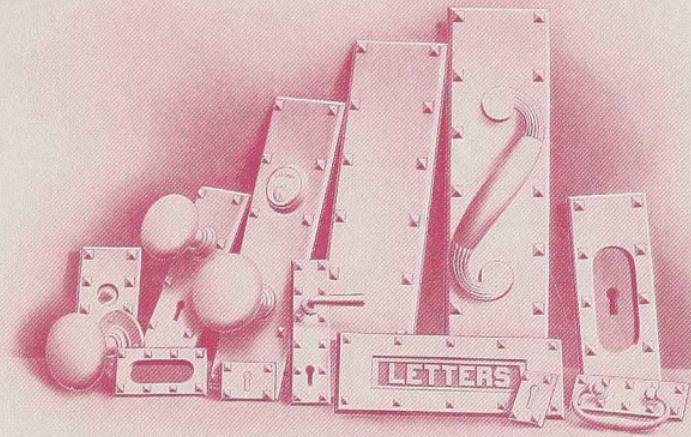

C P—CLINTON (COLONIAL)

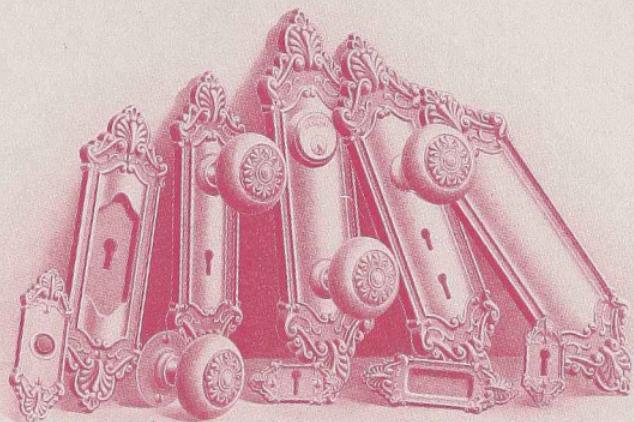

C R—RANDOLPH (COLONIAL)

**H**or you the proposition is a simple one. You intend to build and you need hardware. Hardware is a very necessary part of any building. It must be so made that it will stand the wear and tear of daily use. If it combines beauty with the needed utility so much the better. Sargent's Easy Spring Locks are strongly made. The Easy Spring reduces the friction, saves wear and tear, prolongs the life of the lock. Sargent's Easy Spring Locks give satisfaction.

There is beauty in Sargent's Artistic Hardware. No matter what the style of architecture, we have designs that will conform; designs which are artistic and useful as well.

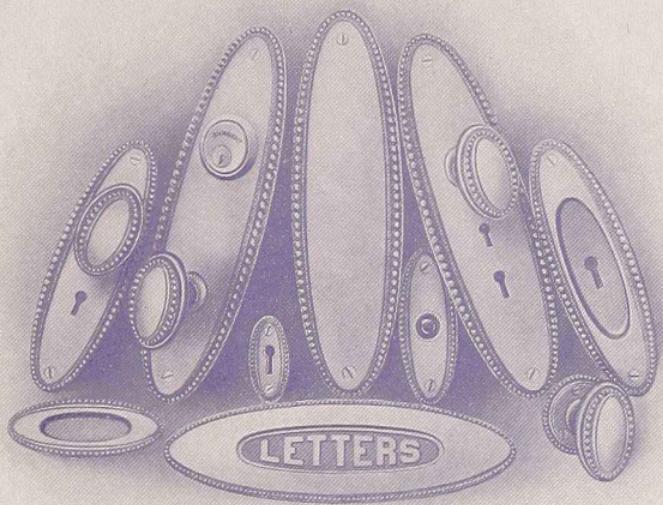

C W—WESTBROOK (COLONIAL)

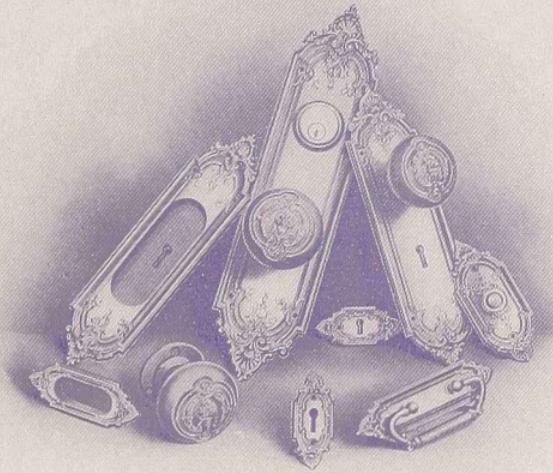

D F—DUNKIRK (FRENCH)

**S**atisfaction is given all around when the house is trimmed with Sargent's Hardware. The architect is pleased because he specified it; the owner is pleased each time he looks at the trimmings, because they add so much to the beauty of the home; and everybody is pleased with the working of Sargent's Easy Spring Locks. If you build to sell, or if for any reason you want to dispose of your house advantageously, it is well to have it finished with artistic trimmings, which cost so little over ordinary hardware.

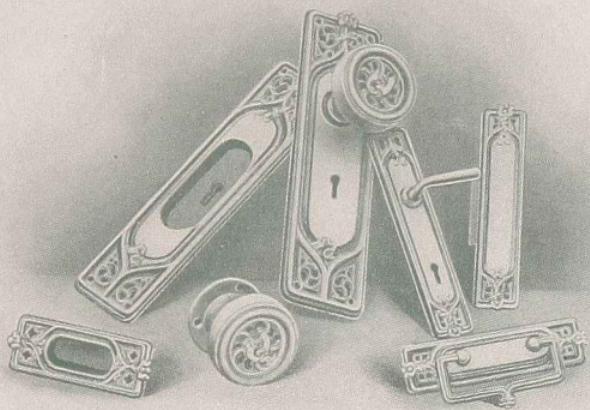

E C—EDGEWOOD (COLONIAL)

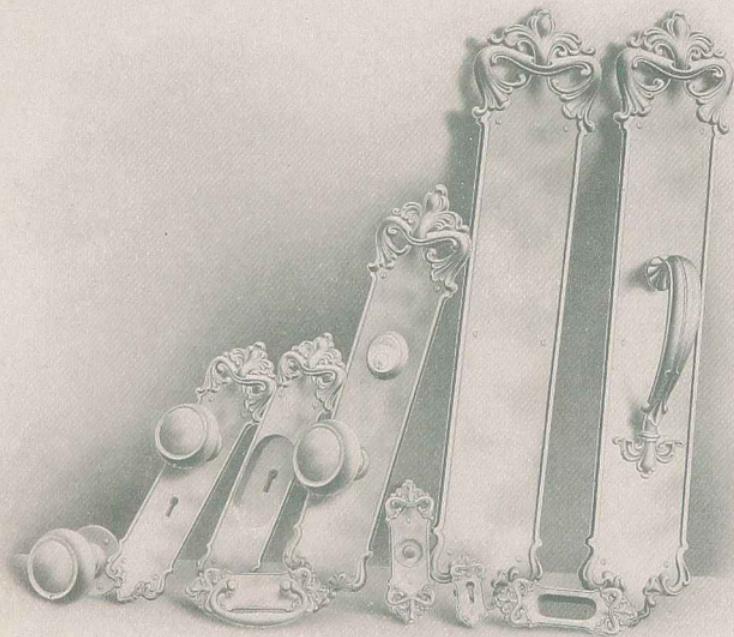

F F—FRONTENAC (LOUIS XV)

**I**t helps sell a house to have it trimmed with handsome hardware and supplied with high-grade locks. Sargent's Easy Spring Locks and Artistic Hardware add to the value of the house when it is on sale, and make it more attractive at all times. In this book we show designs to suit every taste and to harmonize with different styles of architecture.

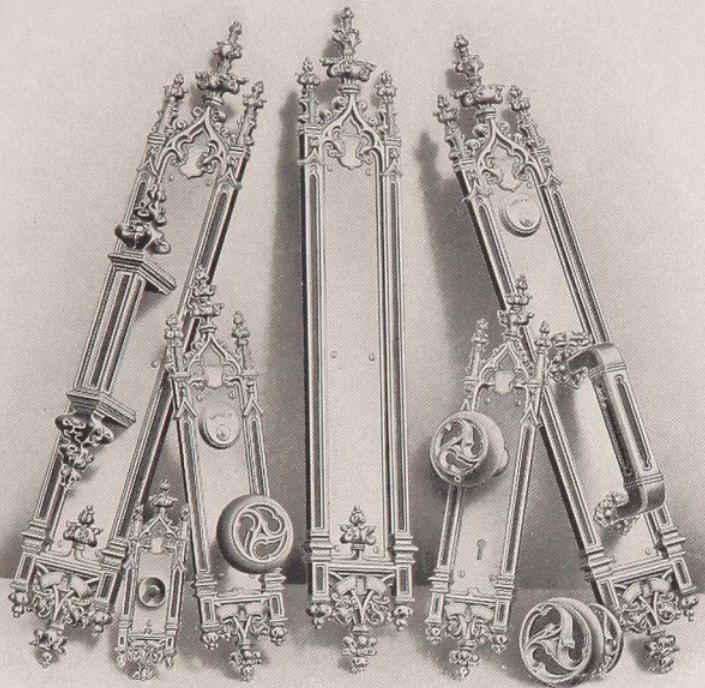

F G—FARGEAU (FRENCH GOTHIC)

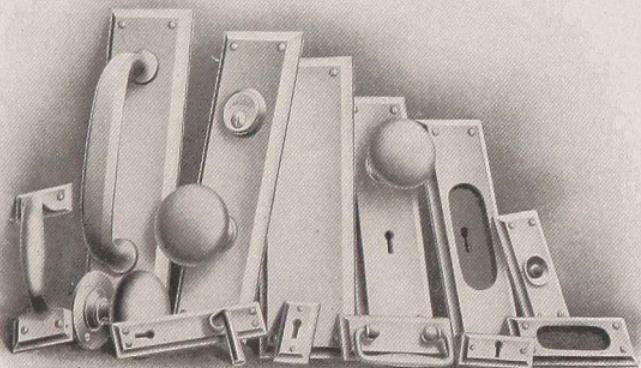

G F—GERONNE (FRENCH)

**C**asement Windows and French Windows are coming into more general use, and for them we make a complete line of appropriate trimmings—Cremorne Bolts, Espagnolette Bars, Fasteners, Adjusters, etc.—which cannot be shown in a book like this.

Your hardware dealer should be able to assist you in the selection of such trimmings, but if he is not, send us a detail drawing of the windows and we will give you the benefit of our experience.

GG—GOTHA (GOTHIC)

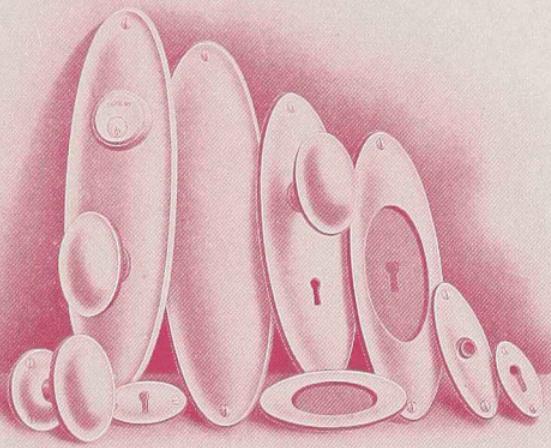

HB—HADLEY (COLONIAL) CAST BRONZE  
TC—TARLTON (COLONIAL) WROUGHT BRONZE

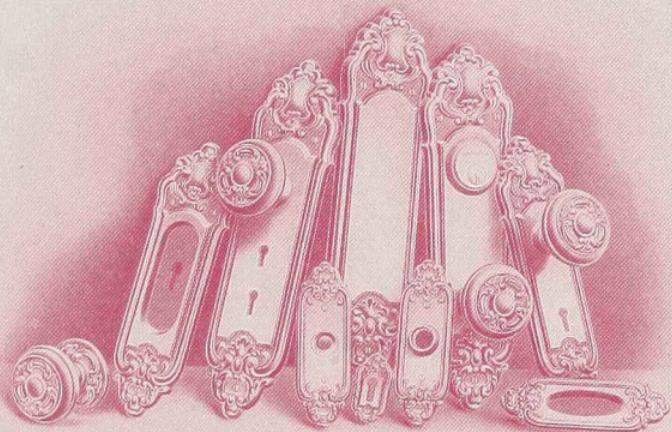

**T**he front door of a house should receive special attention. The customary method is to trim it with a Knob and Escutcheon of suitable size, selected from the designs in this book, and a Push Button to match for operating the electric bell.

For some houses, especially those in the Colonial style of architecture, Front Door Handles are more appropriate.

We make a number of handsome patterns that are shown in our Colonial booklet, which we will send if you are interested in these Handles. This Colonial book also shows Door Knockers, Glass Knobs and other Colonial fittings.

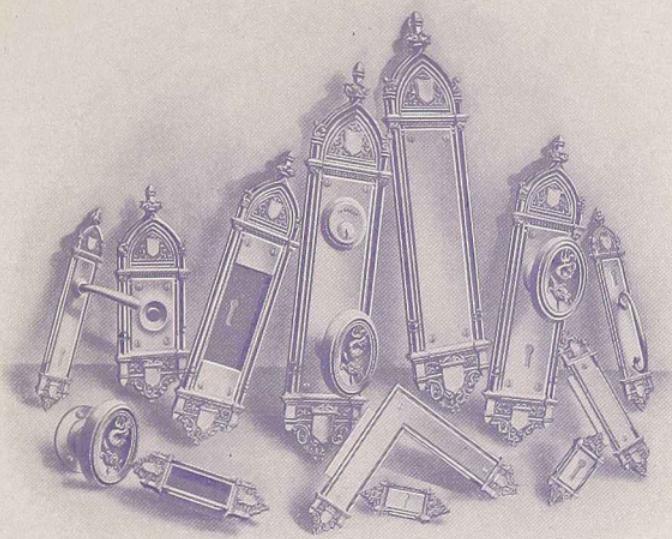

H C—HALIFAX (COLONIAL) CAST BRONZE  
F C—FAIRFAX (COLONIAL) WROUGHT BRONZE

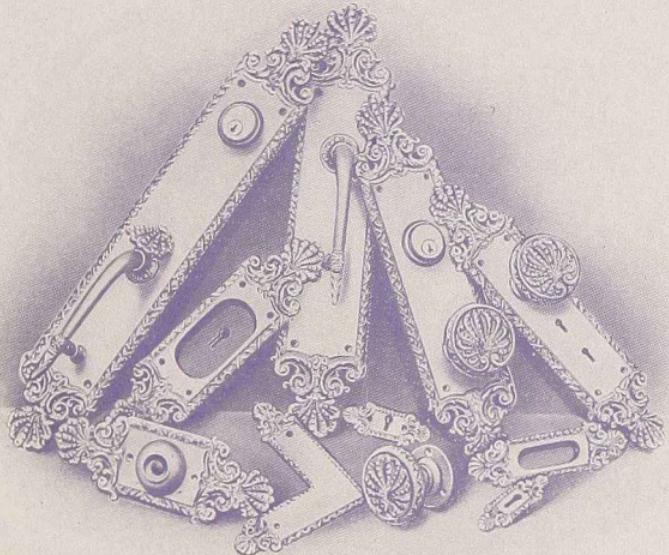

H F—HAVEN (FRENCH)

**B**eautiful homes all over this fair land are made so by completeness of detail. Fine woodwork trimmed with artistic hardware, harmonizing in finish and style, and locks that are right in proportion, working nicely and giving security, are part of the detail which Sargent's Artistic Hardware and Easy Spring Locks provide.

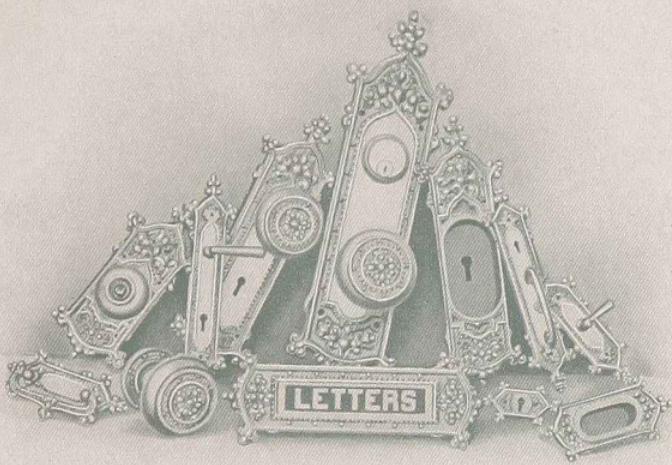

H G—HEREFORD (GOTHIC)

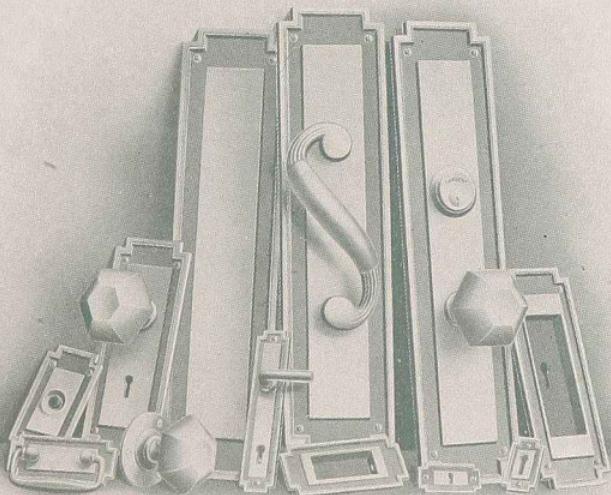

J—JELSI (ITALIAN)

 **The utility of each piece** of Sargent's Artistic Hardware makes it desirable for first-class dwellings everywhere. Our designs permit a careful selection for doors of all sizes; we have trimmings for windows and dressers which are not too big, not too small, but just right in size and correct in every detail. For all kinds of buildings, and in harmony with all schools of architecture, we can furnish suitable trimmings.

K G—KIRKBY (ENGLISH GOTHIC)

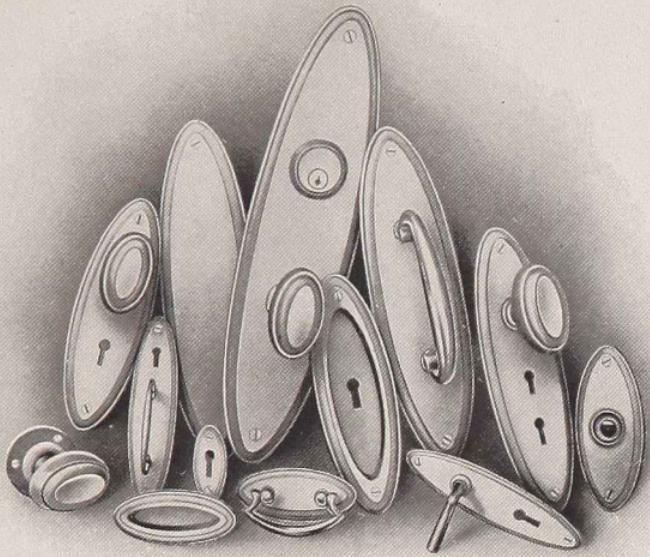

A L—LEPANTO (GREEK)

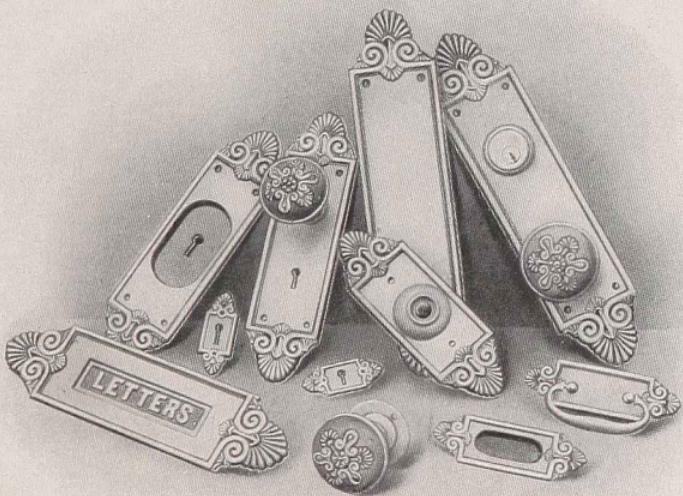

**T**he modern bathroom, with its porcelain tub and snowy walls, requires the accompaniment of Hardware trimmings finished to match the plumbing.

For this purpose we recommend the plain designs made either of nickel-plated bronze metal or our "Eclipse" metal, a kind of white bronze, which is particularly desirable, and is easily kept clean and bright.

Iron trimmings should not be used in a bathroom, as the moisture will cause them to rust.

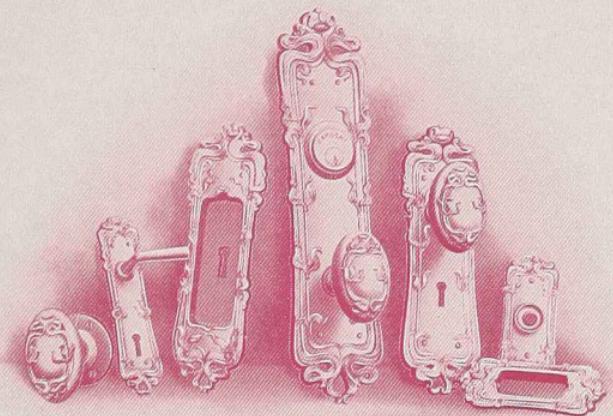

L C—LEICESTER (COLONIAL)

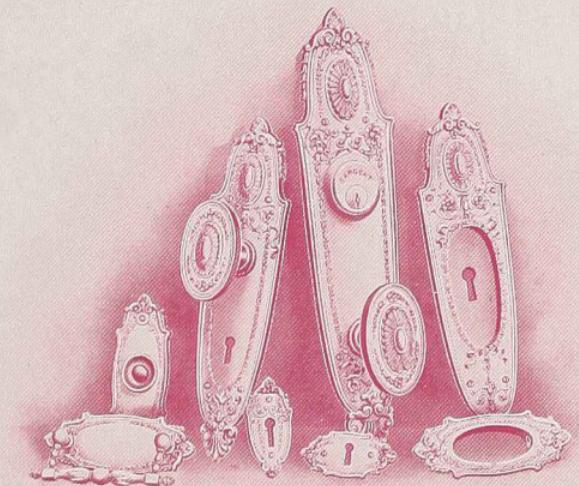

L G—LEMNOS (GREEK)

**S**ome people make their own selection of Hardware; others depend upon the recommendation of the architect. Architects everywhere are specifying Sargent's Hardware, and this book shows why. Art metal work, correct in detail and harmonious in finish, is appreciated by those who have made a study of such subjects.

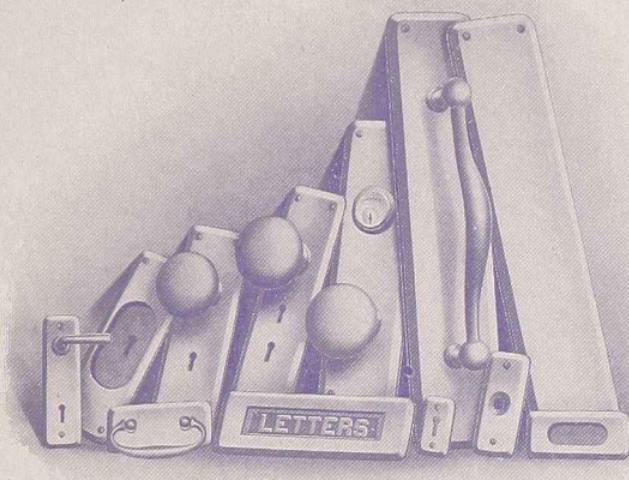

L N—LARNA (L'ART NOUVEAU)

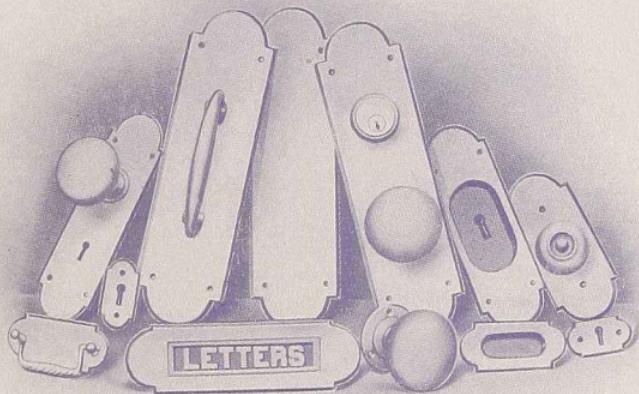

M A—MARION (ADAMS)

**I**n some localities the plain patterns are generally preferred, and the trimmings shown on the following page are the most esteemed. These patterns make a rich appearance in the highly polished natural Bronze Metal color, and they take beautifully any of our special finishes.

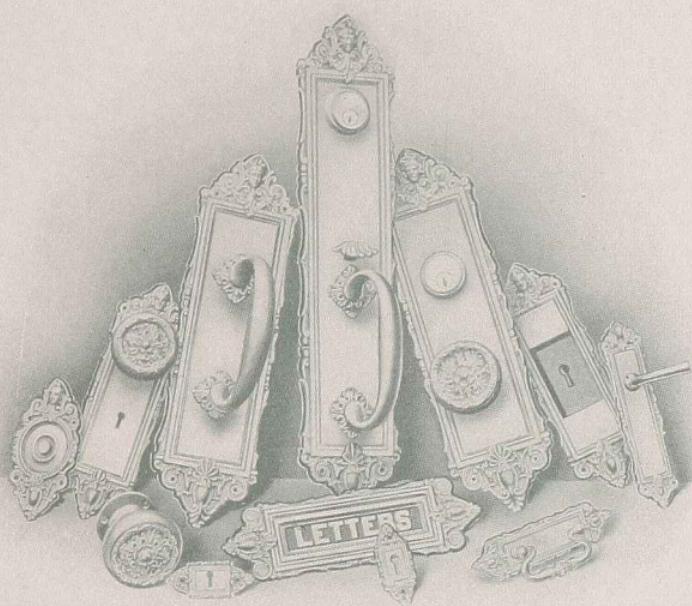

M B—MILTON (COLONIAL) CAST BRONZE  
S B—STAFFORD (COLONIAL) WROUGHT BRONZE

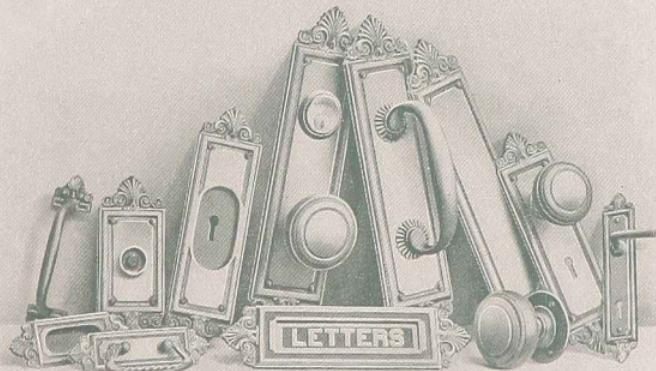

M C—MILFORD (COLONIAL)

**H**armony can be secured in fine houses by the use of Artistic Hardware of proper size and shape, matching the woodwork and corresponding with the style of architecture. Sargent's Hardware is harmonious in its details, and it can be furnished in all of the finishes that modern taste requires.

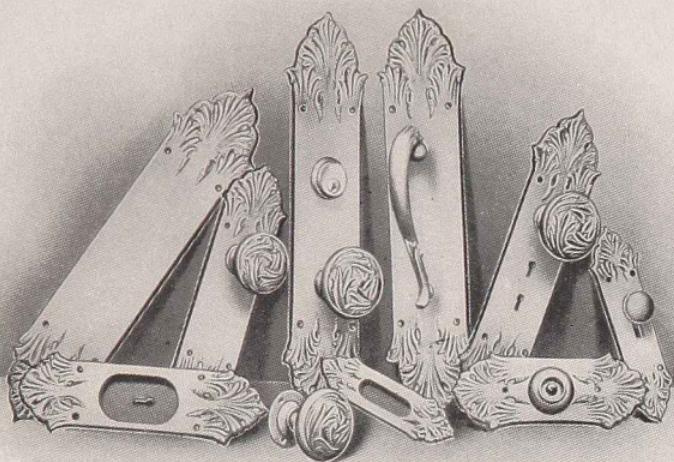

M F—MONTFORT (MODERN FRENCH)

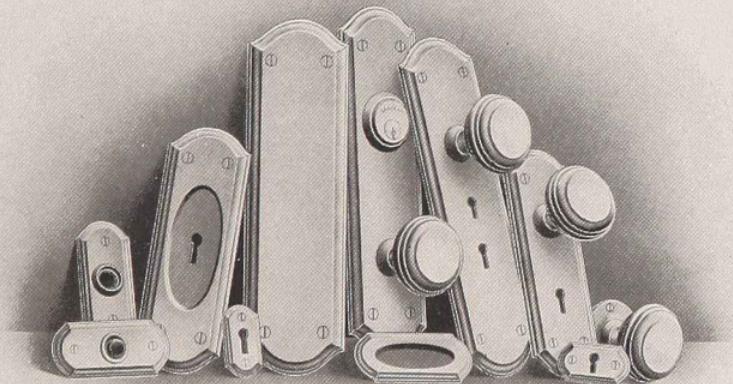

M G—MILO (GREEK)

**T**he right thing for the right place can be secured if careful, personal attention is given to the selection of Hardware.

Sargent's Hardware comprises everything that is needed in a building; the front doors, side doors, interior doors, sliding doors, swinging doors, casement windows, French windows, double-hung windows, swinging windows, transoms and all parts of the house can be fitted with trimmings that perform in the best manner the services that are required.

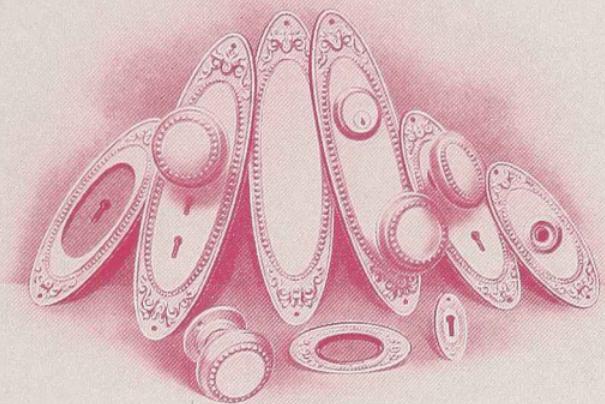

N—NANTUA (ROMANESQUE)

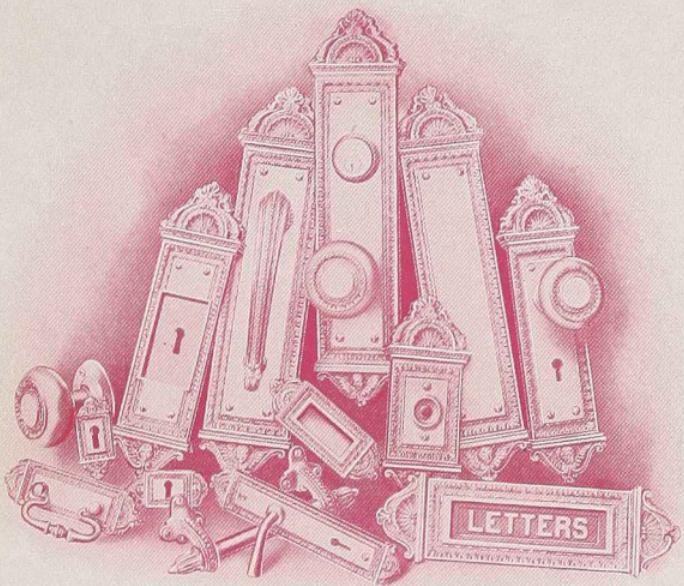

P E—EXETER (COLONIAL)

**C**ount the cost. There is no economy in the use of cheap hardware ; in the long run it does not pay. Durable locks and trimmings that will last and give good service as long as the building stands are the kind you need for your new home. Sargent's Easy Spring Locks and Artistic Hardware stand the test. They give satisfaction.

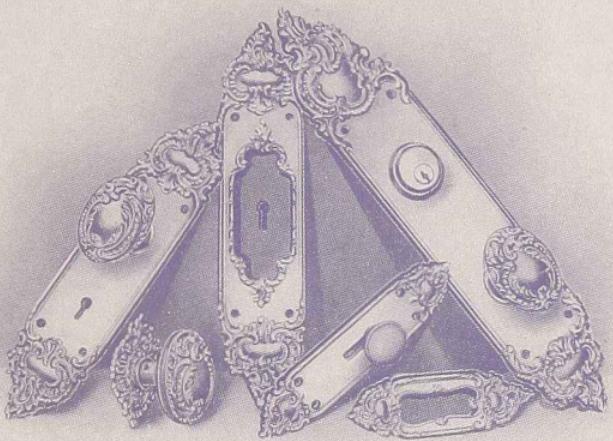

P F—PIEDMONT

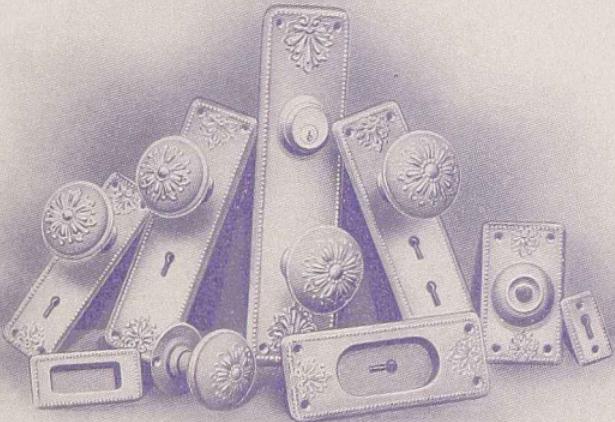

P R—PARMA (ITALIAN RENAISSANCE)

**T**he whole family is interested in the selection of hardware for the new home. It is an important matter, but a selection can be easily made from the beautiful designs shown in this book. Beautiful trimmings add to the finish of fine woodwork and increase the attractiveness of the home, while Sargent's Easy Spring Locks, by their perfect construction and easy working, add to the comfort.

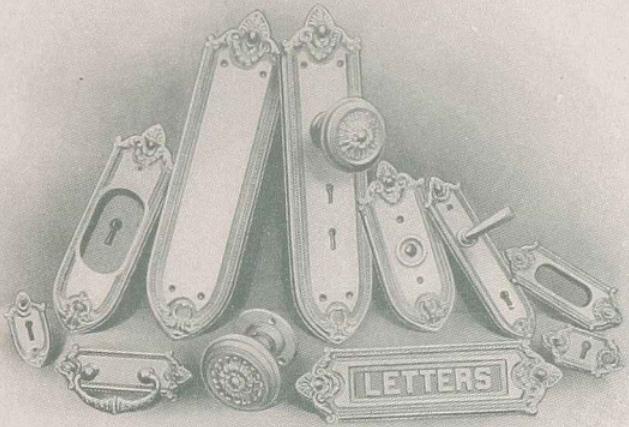

R C—ROCROY (ROCOCO)

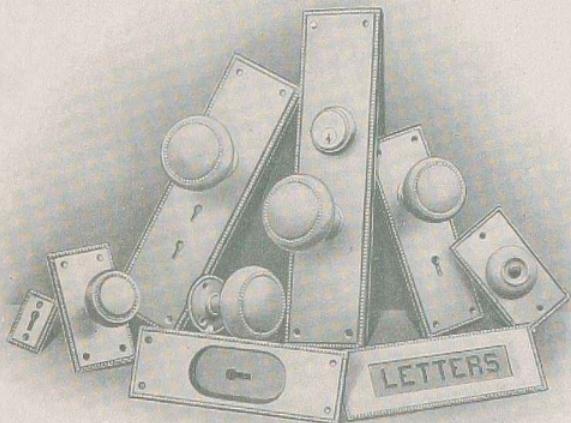

R D DESIGN

**I**t's a matter of taste—to some extent—this selecting hardware trimmings; that is why we show so many designs in this book. With the many patterns there is no reason why a low-priced cottage should not be tastily trimmed with artistic and suitable hardware at a very small advance upon the cost of the poor stuff so frequently used. Good hardware stands the wear and tear of every-day use.

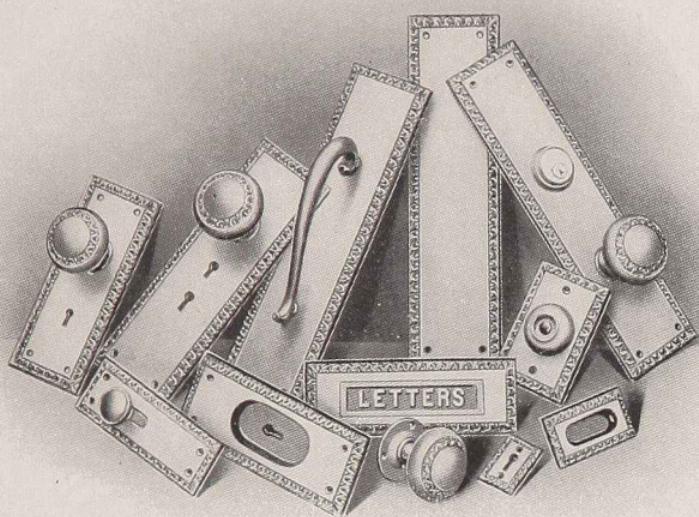

R F—ROYAN (LOUIS XIV)

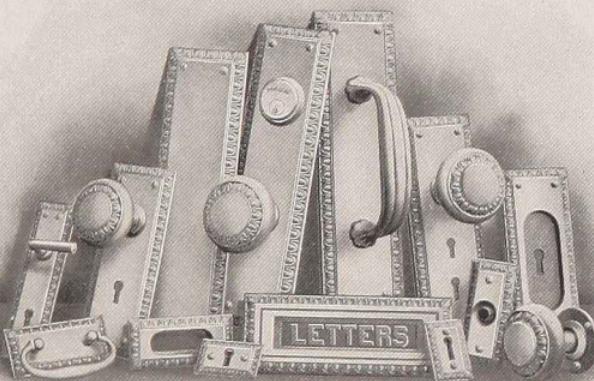

R G—ROYALSTON (COLONIAL)

**I**t is possible for you to select for your house the same trimmings that your neighbor selects, but it is not at all probable as our styles are so varied and tastes are so different. If, however, you fear duplicating, and want something exclusively your own, we can make it for you from your own designs, but, of course, the expense will be much greater than if you should select any of the beautiful designs shown in this book.

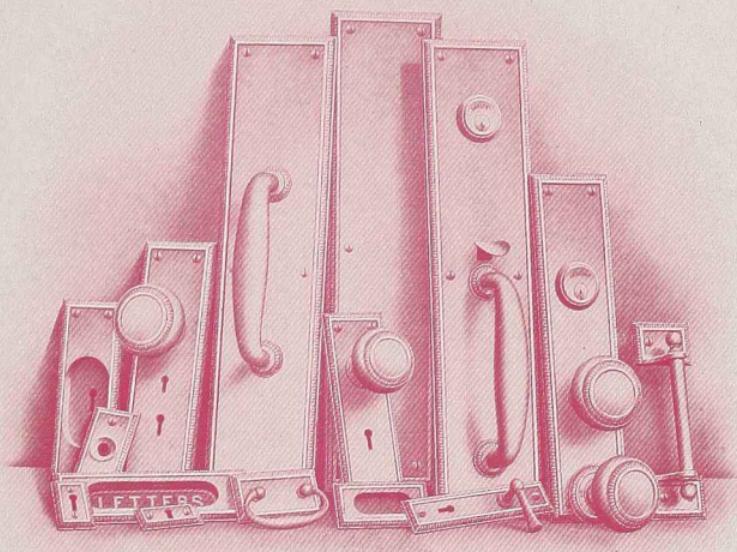

R T—ROSSANO (ITALIAN)

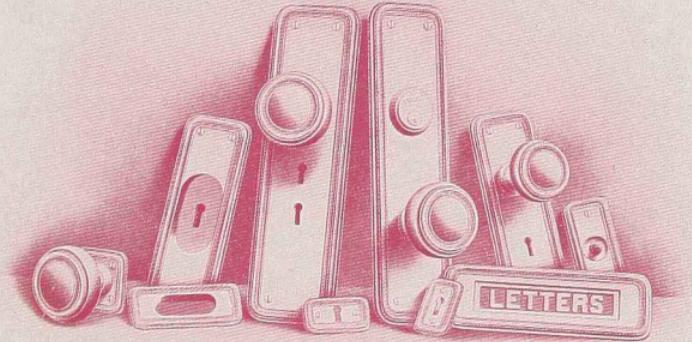

S A—SPARTA (GREEK)

**T**he importance of the hardware is not realized by all people. When it is, more care is used in its selection, and the result is that the home is beautified with but slight, if any, increase in cost, and the occupants experience the pleasure that comes with the use of trimmings that are appropriate and correspond with the other fittings of the building.

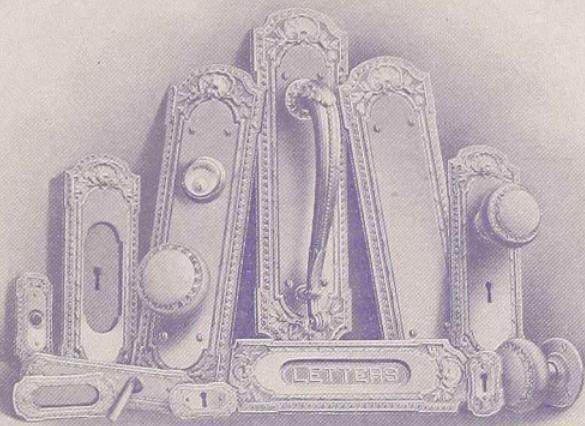

S C—STOCKBRIDGE (COLONIAL)

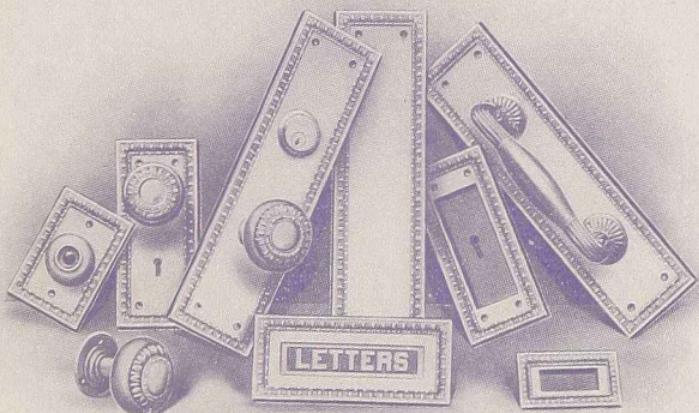

S D—DAKOTA DESIGN (COLONIAL)

**A**s solid, substantial house, with massive doors, large windows, and an appearance which promises years of service, should be trimmed with hardware corresponding with its solidity. Some of the designs shown in this book are made in sizes which would be proper for this use, and Sargent's Locks—especially the heavier styles—are solid and substantial, suitable for any building in which they might be used; they are intended for active service as long as the building stands.

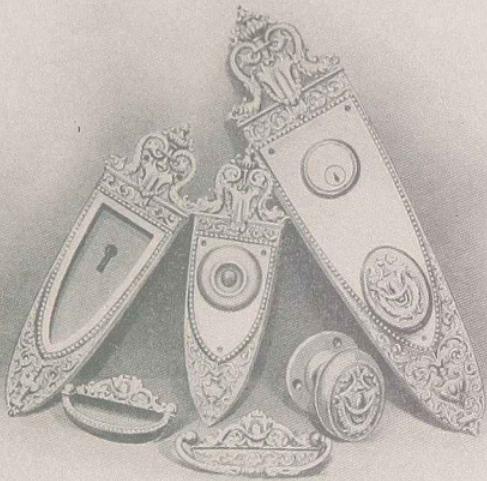

S F—ST. DENIS (LOUIS XVI)

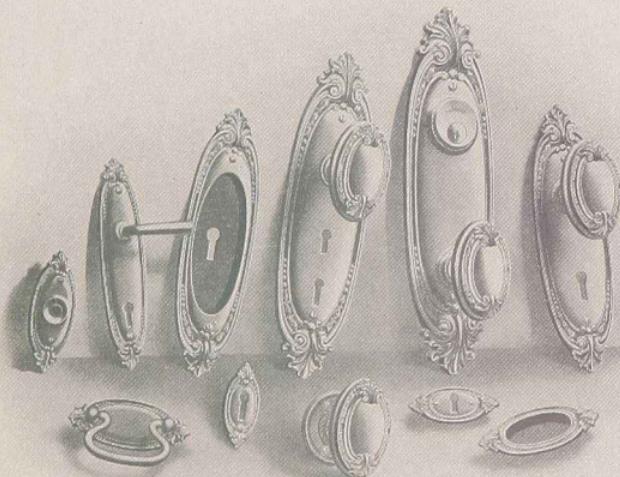

S G—STYLIS (GREEK)

**T**he Master Key system may be as successfully applied to homes as it is to hotels and office buildings. We can supply locks each of which has its individual key that will open no other door but the one for which it is intended, and yet all the locks may be under the control of a Master Key which is carried by the owner himself. The convenience of this system, which can be extended to the stable, the garage, the factory, and the store, will appeal to many men who would substitute one key for the many they are now compelled to carry.

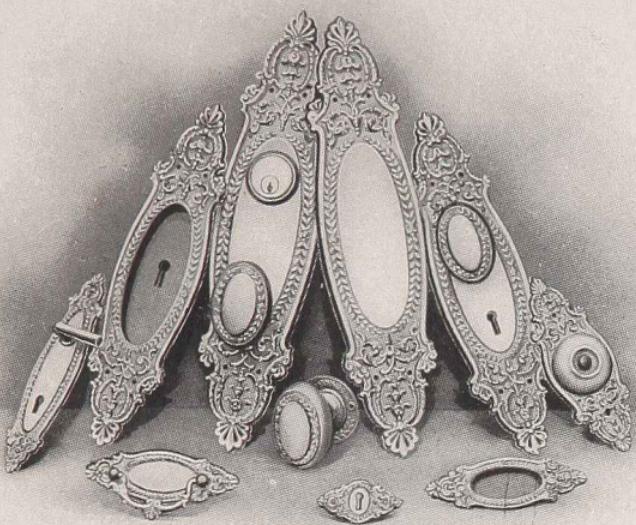

S R—SAVONA (ITALIAN RENAISSANCE)

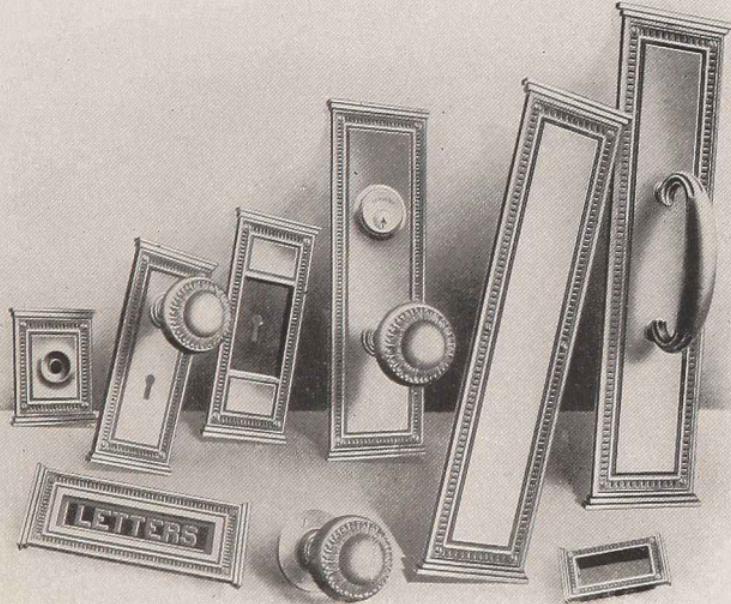

T F—TOULON (FRENCH)

**P**ersonal attention to the selection of hardware will be to your advantage and you will be repaid many times for any trouble you may take. The trimmings illustrated in this book have a decorative value that is appreciated by those whose object is to make the home complete in all its appointments.

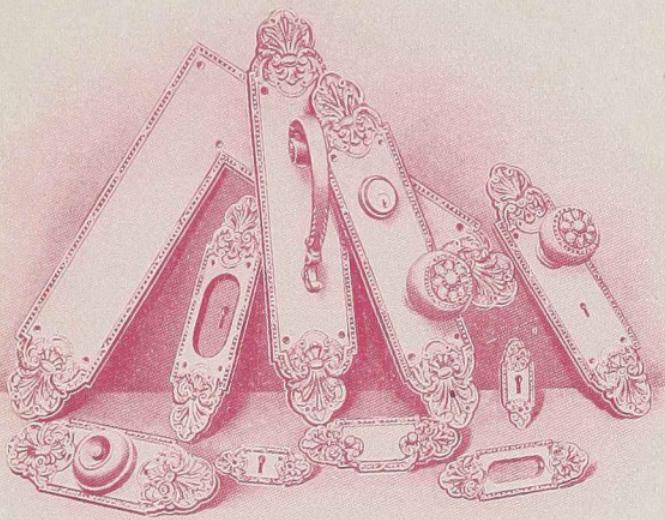

T R—TOURS (FRENCH RENAISSANCE)

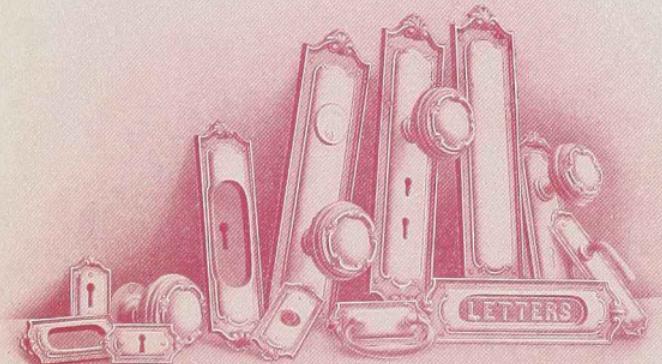

U G—ULYSES (GREEK)

**I**f you don't quite like one design, look through this book and select something that will just satisfy you. If you fall in love with more than one style of ornamentation, follow out the suggestion made elsewhere and select different trimmings for different rooms. All our Hardware may be depended upon for constant service, and, in connection with our Easy Spring Locks, will last a lifetime.

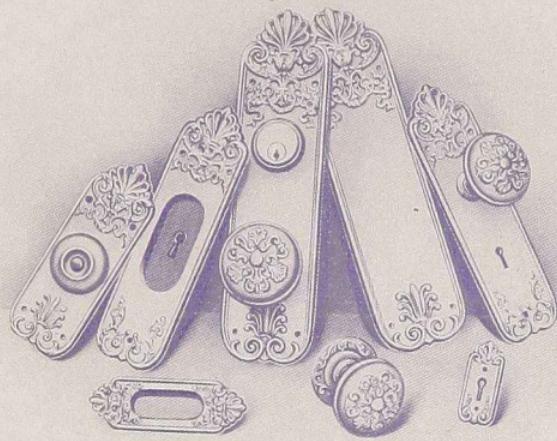

V—VENDÔME (LOUIS XIV)

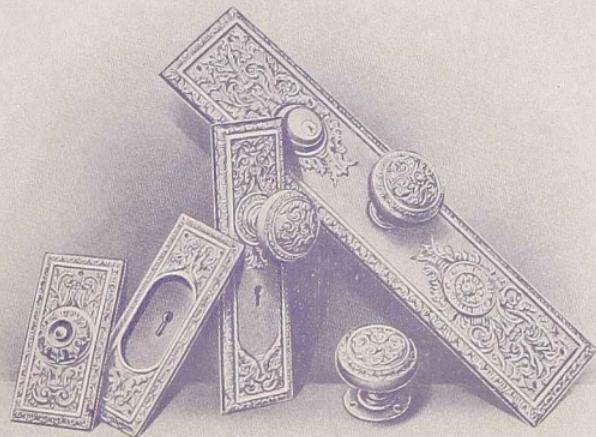

V F—VERNON

**T**he selection of finishes affords opportunity for difference in taste. We finish our Bronze Metal and Brass Goods in a variety of shadings and colorings—some with polished surfaces and others with the sanded effect. We have Silver Plated, Gold Plated, Nickel Plated, Verde Antique and "Rustless Iron" Finishes, as well as many others. Your hardware dealer should have on exhibition samples of our different finishes from which you can choose.

V R—VERONA (ITALIAN RENAISSANCE)

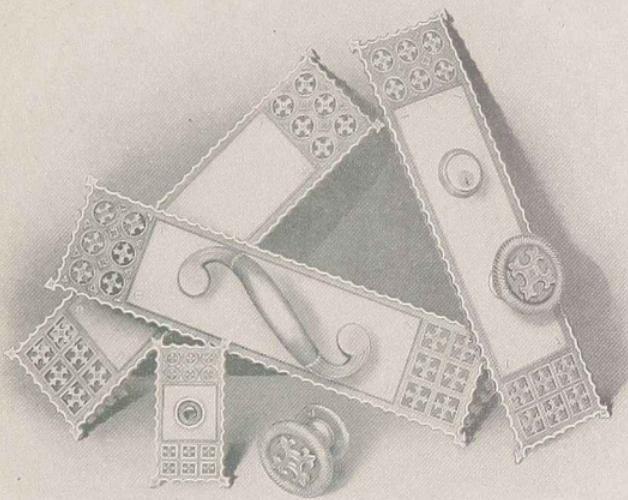

W—WICKFORD (ITALIAN)

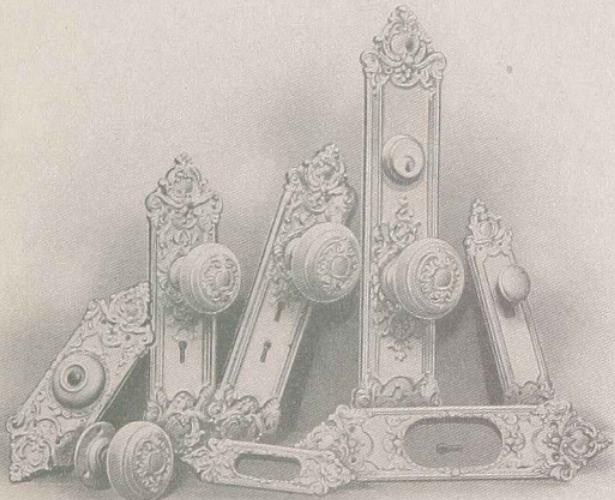

**A**n important point to be considered by home-builders is that the order for the hardware should be placed early, not waiting until the house is ready for the trimmings.

Sargent's Artistic Hardware is made in great variety, and as tastes differ in the matter of designs and finishes, each order must be handled separately and given special attention in the various departments of a very busy factory.

We suggest, therefore, that you make your selection of designs and place your order for hardware as soon as the building is started, and so give us the time we need to properly attend to the order when your dealer sends it to us.

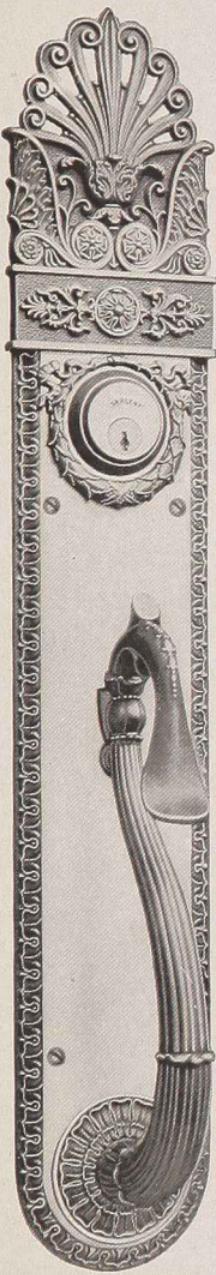

W G—WESTMINSTER (GOTHIC)

Y—YGRANDE (LOUIS XIV)

**S**tore Door Handles (used also for the front doors of dwellings) we manufacture in an almost endless variety. Illustrated herewith are two of the most elaborate and popular patterns for fine work. Although those shown are fitted for Sargent's Cylinder Locks, we also furnish fine Store Door Handles with Flat Key Locks as well.

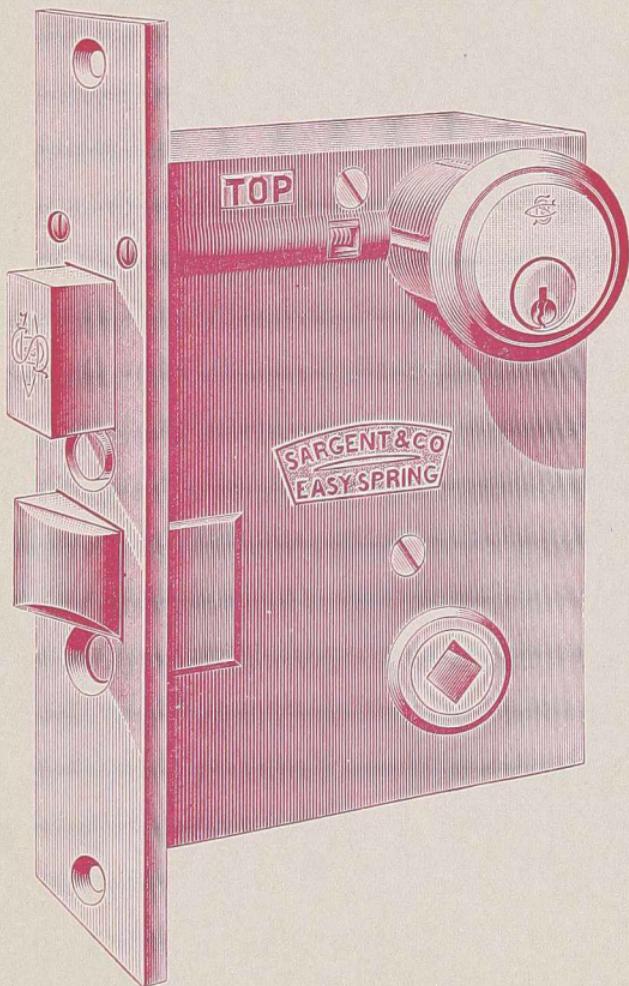

## **Easy Spring Locks**

**S**argent's Easy Spring enables the Latch Bolt to work very freely, so that the door does not have to be slammed nor stand ajar, but latches gently as it is closed. This is accomplished by using a good stiff spiral spring, with a long leverage for the Latch Bolt and a direct pull for the Knob, thus producing the desirable combination of

### **Easy on the Latch Bolt Firm on the Knob**

The Spring cannot rub on the case, and it is impossible for it to bow or to get out of position. Working in a direct line, and so short a distance, without friction, gives great durability—no springs to be replaced, nothing to get out of order.

## Sargent's Easy Spring

Sargent's Easy Spring Lock. To insure getting the Easy Spring, be sure that you see  cast on the case of the lock—don't mind the label.

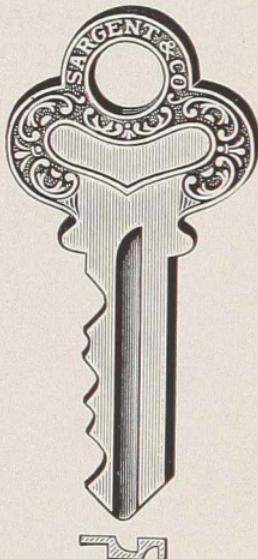

## Cylinder Locks

**G**reat security and a small key are desirable features, which, when combined with our famous Easy Spring principle, produce

## Sargent's Cylinder Locks

the best in the world. The application of the Easy Spring to our Cylinder Locks is not shown in the cut on preceding page, but it is the same principle, and it produces the same results in all of our Easy Spring Locks, both Cylinder and Bit-Key.

Sargent's Cylinder Locks are made in different styles for the different classes of work, all using the same small key, so handy to carry.

## **"Gently as a Whisper"**

**O**ne of the most experienced architects in this country, who has used Sargent's Easy Spring Locks in his own house, writes: "The Easy Spring Lock made by your firm is simply perfection. The door will close as gently as a whisper without any resistance whatever from the lock." Architects everywhere are now specifying

### **Sargent's Easy Spring Locks**

and home-builders are insisting upon their use. They give satisfaction and they will last as long as the building stands.
